

## Special Issue

# Multiple Sclerosis and Related Disorders: From Diagnosis to Treatment

### Message from the Guest Editor

Multiple sclerosis (MS) is a chronic, inflammatory, demyelinating and neurodegenerative disease of the central nervous system (CNS), with an onset between 20 and 40 years and a higher prevalence in women.

Diagnosis of MS is based on the integration of clinical, imaging and laboratory findings, and the exclusion of alternative disorders remains crucial. As the armamentarium of disease-modifying treatments (DMT) has broadened, robust diagnosis in the early phase of the disease has become increasingly critical. Studies published in this Special Issue of *Brain Science* will focus on the diagnosis and treatment of MS and neuromyelitis optica spectrum disorders (NMOSD).

Authors are invited to submit cutting-edge research and reviews related to MS and NMOSD including the following topics: epidemiology, diagnosis, differential diagnosis, new advances in MRI, body fluid biomarkers, treatment algorithms, Patients Reported Outcomes (PRO) and quality of life. Submissions should be based on Real-World Data (RWD) and Real-World Evidence (RWE) and its impact and relevance in daily clinical practice.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
