

## Special Issue

# Prediction and Prevention of Psychotic Disorders

### Message from the Guest Editors

Historically, psychotic disorders like schizophrenia have been managed reactively. Recent advances in neuroscience, genetics, and epidemiology have shifted the focus to early identification and prevention. This Special Issue aims to explore innovative strategies for predicting and preventing psychotic disorders, covering epidemiological studies, biomarkers, neuroimaging, genetic research, psychosocial interventions, and public health strategies. The goal of this Special Issue is to foster multidisciplinary dialogue and develop comprehensive prevention frameworks. Recent research highlights promising biomarkers, genetic risk factors, and effective psychosocial interventions like CBT. Machine learning is being used to create more accurate prediction models by integrating diverse data. We seek the submission of original research, reviews, and case studies to our Special Issue focused on biological and psychological markers, longitudinal studies, innovative interventions, and public health approaches. Submissions from psychiatry, psychology, neuroscience, and related fields are welcome to provide a holistic view and encourage collaborative prevention efforts.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
