Multiple Sclerosis Across the Age Spectrum—Beyond Inflammation

Message from the Guest Editor

Background and history: Multiple Sclerosis is a neuroinflammatory and neurodegenerative disorder of the central nervous system, characterized by the progressive accumulation of motor disability. For many years MS has been considered as a purely inflammatory disorder; however, in recent years, the intrinsic neurodegenerative component has been established, thanks to the high efficacy of disease modifying treatments. Alongside this important consideration, the role of age and age-at-onset in determining long-term disease outcomes has had an increasing importance.

Aim and scope: This Special Issue is aimed at enhancing and promoting independent research that studies the impact and importance of neurodegeneration in MS patients across the age spectrum, especially in ageing and pediatric MS patients. **Papers accepted:** expert opinion; review; original articles.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA 15260, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
