

Special Issue

Mood: Cognition, Brain, and Behavior

Message from the Guest Editor

Mood is a diffuse affective state—associated with negative or positive valence—whose antecedents are related to a widely distributed network of factors, and whose manifestation is more durable than that of emotion. Sometimes, people are unable to evoke specific causes for their current mood. Thus, we need to improve our understanding of its complex “ecology”. This topic has long been of interest to scholars as mood variation can greatly contribute to modification of brain, cognitive, and behavioral activities.

This Special Issue will gather research on mood in all its forms. This includes fluctuations in normal mood as well as bipolar and depressive disorders, among others. Contributions linking mood to behavior and/or cognition, neuroimaging data, environment, fatigue, genetics, health, or hormones, are of particular interest. We are also eager to publish research on emotions, provided the authors explain the relationships between emotion and mood, and state how their work could inform the literature concerning normal mood or mood disorders.

Original research, critical and systematic reviews, meta-analyses, and methodological notes will all be considered.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
