Emerging Treatments for Patients with Disorders of Consciousness

Message from the Guest Editors

Treating patients with severe acquired brain injuries remains a true conundrum for clinicians. Thanks to an impressive number of prospective neurocognitive studies performed on chronic patients and recent multi-center studies with larger sample size, precious information has been gathered on the functional recovery of cohorts of these patients through the years. In this context, the American Academy of Neurology (AAN) and the European Academy of Neurology (EAN) recently published guidelines regarding the management of patients with disorders of consciousness, representing a first step in improving care for these patients and helping scientists to develop an agenda. There is now a real need to develop and validate treatments. In this Special Issue, we would like to offer readers an overview of the latest research aiming to develop new therapeutic options for this challenging but certainly not hopeless population.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA
15260, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
