Early Recognition of Alzheimer's Disease

Message from the Guest Editors

The discovery of a cholinergic deficit in Alzheimer's Disease has driven over 40 years of progress in understanding the neurobiology of clinical dementia syndromes. Landmark discoveries in neurogenetics, molecular neurobiology, and clinical neuropsychology have revealed new research questions. The early recognition of progress to dementia remains a critical limiting step in navigating ways towards new treatments, and the delay or even prevention of dementia onset. In this collection of invited papers, these questions and the implications of their possible answers are set out. Pathways that lead to a better understanding of early Alzheimer's Disease, that improve methods of early detection, clinical practice, and conduct of clinical trials will be considered in this Special Issue of *Brain Sciences*. We are looking forward to hearing from you soon.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA
15260, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
