How Emotions Guide Decision-Making: Behavioral and Brain Mechanisms

Message from the Guest Editors

Over the years, there has been increasing interest in understanding the neural and psychological mechanisms behind decision-making. Building on behavioral economics findings and methods from neuroscience, scholars have largely increased our understanding of how we make complex decisions in individual, interpersonal, and social contexts. In such situations, the affective factor is fundamental to understanding how we deviate from simple rationalism, and can provide great insight to better comprehend real-life situations. Emotions are known to affect decisions in multiple ways, from shifting preferences to affecting risk-averse behaviour, to reducing or increasing rates of acceptance of proposers and biasing choices. Additionally, emotion regulation and dysregulation are important factors to understand how decisions deviate from control in specific clinical populations. This Special Issue aims to present a collection of studies detailing the most recent advancements in the field of affective decision-making. Original research papers advancing our understanding of how emotions guide decision making in terms of behavioral and brain mechanisms are solicited for this Special Issue.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
