Gait Pathology in Multiple Sclerosis: Functional Assessments and Therapeutic Interventions

Message from the Guest Editors

Walking dysfunction and impaired mobility is frequent among people with multiple sclerosis (PwMS). Given the high incidence of gait disorder in PwMS, restoration of walking function is a main objective in this field of research. Advanced assessments of gait function are increasingly used to track disease progression, to guide treatment decisions and to quantify the efficacy of therapeutic interventions in an objective and sensitive fashion. Moreover, instrumented gait analysis using state-of-the-art technology is able to shed some light onto the neural mechanisms underlying gait pathology in MS.

This Special Issue is dedicated to highlighting current research advancements in the field of MS-related gait dysfunction and rehabilitation. Authors are invited to submit cutting-edge original research and reviews broaching the topics of gait impairment profiling, novel rehabilitative strategies, refinement of functional outcome measures, neural mechanisms underlying walking abnormalities and related areas.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA
15260, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
