

Special Issue

Perception, Motor Imagery, and Action in Real Research and Virtual Environments

Message from the Guest Editor

This Special Issue of *Brain Sciences* features articles/reviews about perception and motor cognition, motor imagery, and action in both real (using classical/conventional methods and techniques) and interactive virtual environments, focusing on multidisciplinary (observational, empirical, practical and theoretical) approaches to evaluate how human beings think, understand, and process the real or virtual world around them. In addition, many studies show virtual reality as a tool for investigating, for example, perception–action, motor imagery training/modeling, or navigation, and this is a fascinating new direction in the development of sensory, cognitive, and motor neuroscience in health and disease. We encourage researchers and clinicians to present research findings and reviews on this topic, as well as related and key issues that may contribute to the future development and understanding of discoveries in neuroscience.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA
15260, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
