

Special Issue

New Horizons in Multisensory Perception and Processing—2nd Edition

Message from the Guest Editor

The concept of perception has changed from the simplest concepts of 'receptor organ' and localized receptor, the framework has extended to a 'diffuse' receptor system, where the simple sensory response and perception lose their meaning if not included in a multisensory and multilevel perception system, within a process that starts from epigenetic transformations up to endogenous perceptual transformations. Chemoceptive processes, as well as those connected to auditory, tactile, and vestibular aspects, are adapted to multisensory aspects, where the concept of single-sensory perception is abandoned to expand to a concept of integrated and multi-sense perception. Studies conducted with methodologies, such as electrophysiology, functional magnetic resonance, fNIRS and cortical stimulation techniques, are welcome. Furthermore, both clinical and basic research models are welcome. This Special Issue aims to promote scientific articles that highlight the new horizons in multisensory perception and processing.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA
15260, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
