### **Special Issue**

# Attention to Neuromuscular Diseases

### Message from the Guest Editors

Neuromuscular diseases include a large group of genetic or acquired disorders affecting peripheral nerves, muscles, and the neuromuscular junction. In recent years, enormous progress has been observed in therapy for both genetic forms, such as hereditary transthyretin amyloidosis (ATTRv), or acquired autoimmune forms, such as myasthenia gravis. The objective of this Special Issue is to focus on the news and progress in this specific field, which will be increasingly relevant to neurologists.

### **About the Journal**

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA 15260. USA

#### **Author Benefits**

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYNDEX, PsycInfo, CAPlus / SciFinder, and other databases.

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

### **Recognition of Reviewers:**

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
