Advances in Neuroinflammation

Message from the Guest Editors

Background and history of this topic:

Neuroinflammation, mediated by the formation of multiple cytokines, chemokines, reactive oxygen species, etc., has been found to be involved in the aetiopathology of a plethora of neurological diseases. Accumulating evidence from clinical and preclinical studies has validated the great potential of neuroinflammation in the research perspective in terms of mechanism and treatment studies.

Aim and scope of the Special Issue: This Special Issue of Brain Sciences aims to present the recent advance in neuroinflammation research on preclinical and clinical areas, especially focusing on but not limited on neurodegenerative diseases. Cutting-edge research: In vivo and in vitro studies related to the advance on conception, technology renovation, novel models, etc., which could be applied to study the role of neuroinflammation in neurodegenerative diseases are especially welcome.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA
15260, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
