

Special Issue

Advances in the psychology of the language teacher and the language learner

Message from the Guest Editor

This Special Issue aims to collect research studies inspecting novel perspectives in teacher and learner psychology. To this end, emerging trends include systems-informed psychology (SIP), psychologies in online settings, 'Time Series Analysis (TSA)', 'Ecological Dynamic Systems Theory', 'Latent Profile Analysis (LPA)', and 'Idiodynamic Method'. Future studies may also utilize Ecological Momentary Assessment, Experience Sampling Method, Relational Theory, Retrodictive Qualitative Modeling, Social Network Analysis, and Latent Growth Curve Models. Furthermore, the dyadic and contagious nature of psycho-emotional factors related to teachers and students and their process tracing and ergodicity can be explored by enthusiastic scholars. The role of globalization and the internationalization of English in relation to teacher and learner may also be considered. In addition, cross-cultural studies can be conducted to unveil the role of multinational and multicultural contexts on psycho-emotional and cognitive factors involved in English language education.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA
