Special Issue

Ageing and Geriatric Neuropsychology: Assessment and Intervention

Message from the Guest Editor

Geriatric neuropsychology focuses on the relationship between cognition, the brain, patients' clinical status, and risk and protective factors. Playing a significant role in supporting older adults, it can aid with diagnostic elucidation, including the distinction between cognitive decline associated with normal aging or pathological processes. It can also identify mood alterations and psychopathological processes that compromise autonomy. Additionally, it helps clarify the factors that contribute to successful aging. Geriatric neuropsychology also facilitates the development and implementation of intervention strategies that promote cognitive, emotional, and functional resilience within older adults, providing evidence-based interventions to optimize older adults' quality of life. This Special Issue will provide a resource for clinicians, incorporating recent research and information from geriatric neuropsychology and related disciplines. Original research and theoretical contributions (reviews, hypotheses, and opinion articles on future directions) are welcome.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney
Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA 15260, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYNDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
