

Special Issue

The Effects of Adverse Childhood Experiences on Emotional and Mental Health

Message from the Guest Editor

This Special Issue delves into the intricate relationship between adverse childhood experiences (ACEs) and their profound impact on emotional, mental, and brain health. To illuminate the full spectrum of ACEs' impact, we welcome submissions that explore the effects of various stressors, including maternal stress (e.g., leading to dendritic shrinkage), physical stress (e.g., prenatal alcohol exposure, institutional neglect), and the complex interplay of socioeconomic and environmental factors (geographic disparities, access to early intervention).

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
