

Special Issue

Inflammation and Central Nervous System

Message from the Guest Editor

Chronic neuroinflammation can lead to neuronal damage, synaptic dysfunction, and ultimately cognitive and motor impairments. Neurodegenerative diseases, such as multiple sclerosis, Alzheimer's disease, and Parkinson's disease, and brain injury, such as stroke and traumatic brain injury, are strongly associated with inflammatory responses within the CNS. Moreover, systemic inflammatory states and peripheral immune activation can profoundly influence brain function by disrupting the blood-brain barrier and promoting neuroinflammatory cascades. Understanding the complex interplay between inflammation and CNS health is essential for developing effective therapeutic strategies.

This Special Issue aims to provide a comprehensive overview of the latest advancements in inflammation-related CNS research, highlighting current mechanistic insights and exploring novel diagnostic and treatment approaches. It will serve as a platform for neuroscientists, immunologists, and clinicians to share important breakthroughs and foster multidisciplinary collaborations in combating neuroinflammatory disorders.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA
15260, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
