Language Mapping in Epilepsy

Message from the Guest Editors

Surgical intervention has become an important therapeutic approach for drug-resistant epilepsy. The main complication of epilepsy surgery is injury to the eloquent cortex, and the risk of language impairment is a key determinant for surgical candidacy. There are several reports of atypical language dominance and of the reorganization of language networks in children and adults with epilepsy. Moreover, patients who are undergoing epilepsy surgery offer a unique opportunity for the intraoperative study of cortical electrophysiology, furthering our understanding of language systems. In this Special Issue, we invite submissions pertaining to advances in our understanding of the linguistic networks in patients with epilepsy and of presurgical neuroimaging and intraoperative mapping techniques for language function in this patient population.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
