From Bench to Bedside: Motor-Cognitive Interactions

Message from the Guest Editor

Motor and cognitive impairments are commonly examined independently of each other, but the understanding of task-dependent interaction between cognitive and motor systems, each with distinct neuroanatomic substrates, has highlighted an interaction between them. There is increasing evidence on the impact of the motor and cognitive interaction in neurodegenerative disorders and other clinical populations such as dementia, stroke, Parkinson's disease, and Multiple Sclerosis. So, great effort has been dedicated to developing rehabilitative strategies targeting motor-cognitive interactions to improve conditions in these diseases. This Special Issue of *Brain Sciences* covers the latest advances in the understanding of key mechanisms of motor-cognitive interactions and innovative treatments. Authors are invited to submit cutting-edge research and reviews that address a broad range of topics related to motor-cognitive interactions. Above all, our intention will be to highlight the latest findings on this topic and present their possible applications to the clinic.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA
15260, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
