

## Special Issue

# Neurobiology of Sexual Orientation and Gender Identification—Findings and Challenges

### Message from the Guest Editor

The discourse surrounding sexual orientation and gender identity has seen seismic shifts in the past few decades in many countries around the world. Whereas much of the research on these topics addresses personal and social elements such as inclusion, prejudice, morality, and rights, biological underpinnings of the aetiologies of gender and sexual orientation minorities have been invoked repeatedly by both scientists and activists of social reforms and acceptance of LGBTQIA+ rights. The purpose of this Special Issue of *Brain Sciences* is to provide an outlet for cutting-edge research on relevant questions that may address, but are not limited to neuroanatomical comparisons of groups that differ in their sexual orientation or gender identity, comparisons of (sexual/non-sexual) stimuli processing between such groups, updated reviews and/or meta-analyses of the existing neurobiological research that focuses on one or more such groups, and ethical considerations for neurobiological research that focuses on gender and/or sexual orientation minorities. You are welcome to contribute.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
