Relationships between Neural Correlates and Decision Variables and Schizophrenia

Message from the Guest Editor

It is my pleasure to announce that I will be editing a collection of articles on the relationships between neural correlates and decision variables and schizophrenia for the journal *Brain Sciences*, to which I invite you to submit a manuscript due to your expertise in this area. I welcome manuscripts describing results from MRI and EEG studies of decision-making under uncertainty in psychotic illness, factors driving set-shifting vs. set maintenance, the exploration/exploitation trade-off, cost/benefit decision-making, or related topics. Studies linking neural and psychological processes underlying decision-making to the severity of psychiatric symptoms in psychotic illness, or clinical or functional course would be of particular interest. Studies examining neural and psychological processes underlying decision-making as potential treatment targets would be of interest, as well.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
