

## Special Issue

# Neuropathology of Alzheimer's Disease

### Message from the Guest Editors

It has been over 100 years since Alois Alzheimer's paper describing the pathological aspects of the neurodegenerative disease that now bears his name; however, there is still a significant amount we do not understand about the disease's causation, development and potential treatment target areas. Indeed, considering that the main pathological proteins involved in the disease— $\beta$ -amyloid and hyperphosphorylated tau—have been known about for some considerable time, there have been disappointing advances in therapeutic intervention. Furthermore, it has also become apparent that there are often more pathological components to many cases of Alzheimer's disease than purely amyloid plaques and neurofibrillary tangles. The significance of additional amyloid angiopathy, Lewy bodies and TDP-43 in the overall pathological process remains to be established. This Special Issue will bring together papers describing recent advances and techniques in the neuropathological examination of Alzheimer's disease.

### Guest Editors

Dr. Claire Troakes  
Prof. Dr. Safa Al-Sarraj  
Dr. Andrew King

### Deadline for manuscript submissions

closed (20 January 2021)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Clinical Neurology) / CiteScore - Q2 (General Neuroscience)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
