

Special Issue

Neuropeptides and Psychiatric Disorders

Message from the Guest Editor

The role of neuropeptides as neuromodulators in the brain is often complementary to classical neurotransmitters' actions. In this context, neuropeptides have been shown to be involved in the pathophysiology of numerous psychiatric disorders, such as anxiety disorders, mood disorders, personality disorders, eating disorders, psychotic disorders, trauma-related disorders, substance abuse disorders, etc. The further development of neuropeptide receptor agonists and/or antagonists with particular properties appears crucial for the treatments and the diagnosis of the disorders. The present Special Issue aims to collect original research studies as well as review and perspective articles that provide future directions and advances for the use of neuropeptide ligands as therapeutic agents able to regulate the central and peripheral physiopathology of such disorders. Therefore, articles or reviews should not be restricted to central actions of neuropeptides but may also concern peripheral regulations that influence brain-related behaviors. We would like this Special Issue to become a major reference for those working in the field of neuropeptides associated pathologies.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
