Pharmacology and Toxicology of New Psychoactive Substances: Focus on Novel Synthetic Opioids

Message from the Guest Editor

Novel Psychoactive Substances (NPS) are a broad variety of drugs not regulated by present legislation. The first wave of NPS came to Europe in the early 2000s in the form of synthetic cannabinoids followed by synthetic cathinones and phenethylamines. From 2016, a rise in the availability of novel synthetic opioids (NSO) was registered in Europe. NSO are the most dangerous NPS since they mimic morphine and heroin and are many times more potent than these opioids in producing acute toxicity. Moreover, they are effective by the intranasal and oral route. Consequently, their use is likely to become the primary source of NPS-associated deaths in Europe, given their increasing prevalence, as opposed to that of other NPS classes. This Special Issue aims to provide an up-to-date overview of pharmacology, structure–activity relationships, and toxicology of NPS and NSO, and the detrimental effects associated with their intake.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
