

Special Issue

Advances in Human Olfactory Perception

Message from the Guest Editor

Research in human olfactory perception has been slowly flourishing over the past decade, and has recently seen major advances and innovation in basic science and theoretical contributions as well as in clinical findings and therapies regarding smell loss. This Special Issue is to bring greater awareness and synthesis to these latest findings and showcase cutting-edge perspectives in human olfactory perception. Thus, this Issue will highlight basic, theoretical, and clinical neuroscience. Manuscripts to be considered for publication in this Issue can present new data or be review articles, and can be solo contributions or multi-laboratory collaborations. Topics can range from the latest data regarding smell loss (e.g., Covid-19) to theoretical discussions of the function of olfaction (e.g., odor and emotion, olfactory navigation), and many topics in between. Methods can include neuroimaging, biomarker sampling, behavior, and psychophysics. Survey/questionnaire data as the sole metric is discouraged. Regardless of the material presented, authors are encouraged to take a broad perspective of the topic they cover and provide a deeper understanding of their topic area as a whole.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
