# The Post-acute COVID-19 Syndrome (PACS): What Do We Know about Its Impact on Brain Health & Health Outcomes

### Message from the Guest Editors

The increasing evidence that severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) impacts the central nervous system (CNS). Health professionals are reporting an increase in neurological and behavioral symptoms, such as depression and cognitive impairment (i.e., brain fog) that could later lead to later to Parkinson's disease, Alzheimer's disease (AD), and related dementias. We will present the most current research and discuss various key symptoms and risk and protective factors, including biomarkers, race, gender, psychological, behavioral, lifestyle, contextual, cultural, and socioeconomic factors, that have been shown to be associated with PACS in various clinical populations (chronic diseases, disabilities, aging, health disparities, etc.). At this time, we are inviting contributions with neurological outcomes.

Please make sure to follow the best reporting practices by The EQUATOR (Enhancing the Quality and Transparency of Health Research) at <https://www.equator-network.org/> and submit the appropriate reporting guideline checklist with your submission (example: <https://www.equator-network.org/reporting-guidelines/strobe>).

---

### Guest Editors

Dr. Patricia Heyn

Founding Director and Professor, Center for Optimal Aging, Marymount University, Arlington, VA, USA

Dr. Preeti Zanwar

Applied Health Economics & Outcomes Research, Jefferson College of Population Health, Thomas Jefferson University, Philadelphia, PA 19107, USA

---

### Deadline for manuscript submissions

closed (15 August 2023)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

---

### Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA  
15260, USA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
