Current Updates on Theragnostic Strategies for Intervention of Brain Diseases and Pathology

Message from the Guest Editor

Brain is the final frontier for biomedical researchers, as the function of the brain has yet to be demystified; we need to have constant updates in the field of cognitive neurosciences and theragnostic interventions to maintain neural homeostatic mechanisms. We are inviting manuscripts related to all aspects of brain sciences and pathology, including advances in brain cancers, Alzheimer's disease, Parkinsonism, ALS and FALS, multiple sclerosis, stroke and cerebrovascular accidents, including etiology as well as newer diagnostic, prognostic and therapeutic strategies for effective interventions. This Special Issue of *Brain Sciences* will charge no publication fees for up to ten accepted peer-reviewed manuscripts.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
