

Special Issue

Prevention and Intervention for Pediatric Brain Injury

Message from the Guest Editor

In this Special Issue, we seek original submissions of research or review articles from authors investigating a variety of prevention and/or intervention approaches from translational animal models or human clinical research. Submissions are encouraged from investigators studying immunological and other molecular therapeutics, those evaluating early behavioral intervention approaches, and/or researchers using neuroimaging and/or epidemiological approaches in clinical populations. Our aim is to assemble a Special Issue that incorporates diverse preclinical and clinical approaches in prevention and intervention for pediatric brain injury.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
