

## Special Issue

# People Recognition through Face, Voice, Name and Their Interactions

### Message from the Guest Editor

Faces, voices and names are the main channels through which we recognize both famous people or those we are personally acquainted with. However, both the modalities used and the difficulty met in the recognition process are different. Perceptual modalities are used in people recognition through the face and voice, whereas linguistic modality is used when recognition takes place through the personal name. Different involvement of the right and left hemispheres in these recognition modalities has been documented. Moreover, several studies have shown that people recognition is more difficult through the voice than through the face or name modalities. A further source of complexity stems from the fact that, in ecological conditions, our interactions with familiar or unknown people occur through more than one of these modalities. However, the details of these interactions are still controversial. The aim of this Special Issue, therefore, is to consider both experimental and clinical investigations that could help to clarify this fascinating but complex issue.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
