Psychosocial Interventions for Mental and Brain Health among Individuals with Chronic Conditions and Disabilities

Message from the Guest Editor

This Special Issue of *Brain Sciences* aims to present current innovations in this field of psychosocial research. Authors are invited to submit pioneering research and reviews that address a broad range of topics including the following: motivational interviewing, group counselling, social and emotional learning, evidence-based interventions, comorbidities, new technological advancements, exercise and physical activity, cognitive and behavioral enhancements, adjustments and lifestyle changes, and neuroscientific research, not limited to, but providing evidence of intervention effects on structural or functional changes in the brain. In essence, we aim to present advancements that may have significant clinical relevance and impact.
