Recent Advances in Hearing Impairment

Message from the Guest Editor

Hearing impairment is a common condition that has received increased attention recently. Scientific studies showing a link between untreated hearing loss and the development of dementia have been particularly instrumental in raising the profile of hearing loss. The classic causes of hearing loss or deafness are genetic predisposition, ototoxic substances and drugs, noise, and aging. Some diseases, such as diabetes, multiple sclerosis, autoimmune diseases, or certain cancers, are also affected by the development of hearing loss. Because this field of research is evolving exponentially, a thematic collection of the latest discoveries could help us keep up to date with these developments. This Special Issue aims to collate recent clinical and basic research that provides new information on the ototoxic effects of drugs (including biologics), as well as the lesser-known disease entities associated with hearing impairment, such as (but not limited to) temporomandibular joint disorders, kidney diseases, Hashimoto's disease, or mitochondrial diseases. New biomarkers for hearing loss are also covered.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
