

## Special Issue

# The Role of Glia in Inflammatory Processes

### Message from the Guest Editors

Central nervous system (CNS) inflammation is a crucial process for brain homeostasis. Microglial cells and astrocytes are among the main players with pivotal functions in controlling inflammatory responses and promoting tissue repair. Although inflammation can be beneficial for the brain, exacerbated responses have been associated with the development of neurological conditions. Despite advances in the understanding of neuroinflammatory processes and the role of glial cells in the brain, much is still lacking in the comprehension of the specific pathways involved in this mechanism. Moreover, the development of better diagnostic tools and therapies is of significance to improve the quality of life of patients with neurological conditions. The main purpose of this Special Issue of *Brain Sciences* is to provide high-quality research on the rapidly growing field of the function of glial cells in inflammatory processes. Recent progress in the comprehension of the underlying mechanisms involved in CNS inflammation and the role of microglia and astrocytes will be of particular importance.

### Guest Editors

Dr. Charles Elias Assmann

Department of Biochemistry and Molecular Biology, Federal University of Santa Maria, Santa Maria, Brazil

Dr. Margarete Dulce Bagatini

Graduate Program in Medical Sciences, Federal University of Fronteira Sul, Chapecó 89815-899, SC, Brazil

### Deadline for manuscript submissions

16 February 2026

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

---

### Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA  
15260, USA

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
