

Special Issue

Research on Down Syndrome

Message from the Guest Editor

In this Special Issue of *Brain Sciences*, we will be discussing the general topic of *Research on Down Syndrome*. We aim to highlight critical areas of basic and translational brain research that may one day lead to the discovery of pharmacological/genetic ways of addressing the developmental and intellectual disabilities, as well as neurodegenerative processes, associated with the trisomy of chromosome 21. We will welcome articles describing system-specific neuropsychological deficits and neurological and psychiatric disorders commonly found in persons with Down syndrome, new experimental data (collected from human beings and animal models) and reviews on the neurobiology and neuropharmacology of Down syndrome, and critical reviews on the design and conduct of clinical trials in this field. We hope we can count on your valuable contribution to make this a successful and impactful Special Issue for this journal.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
