Clinical Research on Tourette Syndrome: Advances and Challenges

Message from the Guest Editor

Tics are sudden, recurrent, non-rhythmic movements, sounds, or vocalization that serve no apparent purpose. Tic disorders are syndromes in which the predominant manifestation is some type of tic. Tourette's syndrome is a commonly recognized tic disorder which is usually associated with attention-deficit/hyperactivity disorder, obsessive-compulsive disorder, anxiety, depression, and other neuropsychiatric disorders. This Special Issue of *Brain Sciences* aims to present a collection of studies detailing the most recent advances in the field of tic disorders. Authors are invited to submit cutting-edge research and reviews focused in the broad range of topics related to epidemiology, biomarkers, clinical courses, phenomenology, and secondary tic disorders and therapies. We aim to present the most recent advances in tic disorders research that may have a significant impact on this field of study.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
