Special Issue

Sexuality in Autism Spectrum Disorders: Past, Present and Innovative Perspectives

Message from the Guest Editors

Historically, sexuality in autism spectrum disorder (ASD) has been understood as a taboo, yet neuropsychological and psychiatric studies reveal a multifaceted reconceptualization that emphasizes different facets, including desire, effort/motivation, anticipation and consummatory pleasure. Individuals with ASD are interested in sexual activity and pursuing romantic relationships, although they often lack psychosexual knowledge and engage in risky sexual behaviors. In the last few years, a high rate of problematic sexual behaviors has been described including public masturbation and paraphilic sexual interests. Despite this evidence, until now systematic studies on sexuality in individuals with ASD have been scarce, without clear indication about sexual orientation, gender-related differences and psycho-educational intervention. This Special Issue is to provide healthcare professionals and interested researchers with clear indications on the latest scientific evidence about the characterization of sexual behaviors in ASD together with the application of innovative perspectives (device, robot, pharmacological) targeting intervention designed specifically for ASD individuals.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA 15260. USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYNDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
