Experimental and Clinical Treatment of Subarachnoid Hemorrhage after Rupture of Saccular Intracranial Aneurysms

Message from the Guest Editors

Subarachnoid hemorrhage (SAH) due to intracranial aneurysm rupture is a devastating event leaving mainly young people in their productive life severely disabled. The dismal outcome in SAH patients was mainly due to delayed cerebral vasospasm. Early brain injury emerged as a relatively new entity, embracing multiple and complex pathophysiological mechanisms that take place early after SAH. The exact roles of these early pathological phenomena are just now being elucidated. This Special Issue aims to provide an up-to-date overview of the pathophysiology, experimental treatment approaches, and clinical management of subarachnoid hemorrhage. We welcome original studies or reviews addressing the major research challenges and achievements on the topic. Potential topics include, but are not limited to: Novel pharmacological therapies; translational and clinical studies; biomarkers in SAH; microcirculatory disturbance; early brain injury; delayed cerebral vasospasm; neurobehavioral aspects; prevention of intracranial aneurysm rupture; epidemiological studies; neuroimaging; clinical guidelines; neurointensive care management; and future perspectives in SAH research.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
