# Recent Advances and Future Directions for the Diagnosis and Treatment of Progressive Supranuclear Palsy

### Message from the Guest Editors

Progressive supranuclear palsy is a primary tauopathy in which abnormal phosphorylated Tau with 4R predominance accumulates. It often presents symptoms similar to those of Parkinson's disease, such as akinesia and postural instability, and differential diagnosis is often difficult, particularly in its early stages. Early and accurate diagnosis and the establishment of effective disease-modifying therapy are necessary to overcome this disorder. The aim of this Special Issue is to share the latest evidence and future directions in this field of research, focusing on the diagnosis and treatment of PSP. Firstly, regarding diagnosis, we welcome studies addressing various imaging modalities (especially MRI and PET (Tau, inflammation), fluid biomarkers (t-Tau, p-Tau, MTBR-Tau) and seeding activity using RT-QuiC. Next, we welcome research on pharmacological treatments such as genetic therapy, microtubule stabilization, post-translational modifications and immunotherapy. Papers that address non-pharmacological treatments (rehabilitation, care) are also welcome.

# About the Journal

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Editor-in-Chief

Prof. Dr. Stephen D. Meriney Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA 15260, USA

## Author Benefits

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYNDEX, PsycInfo, CAPlus / SciFinder, and other databases.

### **Rapid Publication:**

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

#### **Recognition of Reviewers:**

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
