

Special Issue

TMS Investigations of Exercise-Induced Neural Plasticity

Message from the Guest Editor

Exercise is commonly used to engage the nervous system to maintain health and promote recovery in neurological injury and disease. This special issue will focus on studies that use Transcranial magnetic stimulation to investigate exercise-induced neural plasticity. Research should be focussed on the effects of acute exercise bouts or long-term exercise training on TMS measures. Exercise is a term that encompasses any movement paradigm including active and passive movement of the limb, aerobic training, resistance training or a combination of training types. Research in healthy or special populations is encouraged. Research focused on the reliability of TMS measures is encouraged. Original research articles or brief, focussed reviews are acceptable.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
