

## Special Issue

# Metabolic Alterations in Neurodegenerative Diseases and Treatment Options

### Message from the Guest Editors

Metabolic and energetic disturbances have recently been considered not only as a consequence, but also as one of the causes of neurodegeneration. A well-known attribute of neurodegenerative diseases is the progressive loss of neurons. Despite the fact that the causes of these diseases can be polyetiological, they have a wide range of similar molecular and cellular pathophysiological processes, namely protein aggregation, glutamate toxicity, calcium, proteolytic and others, associated with aging.

Neurodegenerative diseases are age dependent, so their development is closely related to common aging mechanisms and metabolic lesions. Cell cultures, animal models, and human studies show close connection between neurodegeneration and metabolic alterations, namely, obesity, glucose metabolism disturbances, and impairments in hormone secretion, including melatonin, leptin, ghrelin, etc.

This Special Issue aims to highlight the numerous metabolic changes in neurodegenerative diseases and related current therapeutic approaches.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

---

### Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
