Special Issue

Novel Interventions for PTSD

Message from the Guest Editor

A long history of research has provided excellent evidence-based options for addressing the psychiatric symptoms of PTSD. However, research in a wide range of areas has also supported the notion that there are numerous health problems/symptoms and related processes that complicate the PTSD presentation. To date, there has been limited research on alternative or adjunctive interventions for these issues, with the goal of providing a more comprehensive or multidisciplinary approach as individuals recover from the psychiatric aspects of trauma. The aim of this Special Issue is to feature research that either directly addresses or has clear implications for novel or alternative interventions in PTSD. The objective is to include papers that will provide a broad perspective on the multidisciplinary approaches to treatment that may enhance quality of life. Examples include, but are not limited to, behavioral or pharmacological interventions to improve health or reduce health risks, studies of interventions that have the potential to enhance neurological functioning. In short, we seek papers that will advance the state of interventions for PTSD due to their innovation.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA 15260. USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYNDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
