Special Issue

The Body in Neurosciences: Representation, Perception, and Space Processing

Message from the Guest Editors

A growing corpus of studies within the cognitive and social neurosciences has advanced our understanding of body processing in terms of multisensorial perception, interoception, and mental representation, as well as its relation with the peripersonal and interpersonal spaces. This Special Issue encourages submissions that can provide new insights into the general mechanisms and neural bases underlying body processing and the relation with different kinds of space. This includes contributions using behavioral, neuroimaging, and neuropsychological approaches and systematic reviews. We also encourage articles that can inform our understanding of the consequences of individual variation in body perception and representation. This encompasses contributions on individual differences and changes across the lifespan in healthy individuals, but also contributions on body processing alterations in patient samples, including both group studies and case reports. Articles on new diagnostic instruments and treatments are also welcome.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney
Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA 15260, USA

Author Benefits

High Visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYNDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:
reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
