

## Special Issue

# Anxious Brain: Stress Influence on the Nervous System

### Message from the Guest Editor

They can greatly affect quality of life, especially in young adults. In this Special Issue, we aim to examine the interrelations between environmental stress factors, such as psychological, and biological (oxidative) and substance misuse, and their impact on the brain structure and function. We will also consider the pivotal role of shifting forms of stress in modern society, due to dynamic changes in lifestyle. It is clear that anxiety and mood disorders also share some clinical features and underlying mechanisms, notably depressive and anxiety disorders which occur as a consequence of adaptation challenges and in response to critical stressful life events. This raises questions about endogenic conditions and “psychogenic” psychopathological reactions, according to Carl Jaspers. Therefore, our Special Issue is open to contributions explaining the mechanisms and stress–diathesis interactions across the whole spectrum of affective disorders and their comorbidities.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
