Special Issue

Impact of the COVID-19 Pandemic on Neurodegenerative and Psychiatric Disorders

Message from the Guest Editor

COVID-19 has caused an increase in the number of neurological and psychiatric diseases. While the impact of the spread of coronavirus on the brain and mental illness is still being measured and reported in several studies, the brain health implications of situations like the one we are experiencing remain under investigation. The new SARS-CoV-2 affected brain risk and prognosis. Its management remains a challenge for healthcare professionals and patients around the world, especially in developing countries. This Special Issue of *Brain* Sciences will be dedicated to publishing the best articles that reflect the efforts and innovation to better diagnose, measure impact, and develop treatments and education for brain disease and related issues. In this Special Issue, we hope to bring together the best original and review articles on various aspects related to diagnosis, prevention, control, treatment, costeffectiveness, epidemiology, education and other issues related to these very prevalent diseases. All submissions will be peer reviewed to ensure the quality and relevance of the manuscripts.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA 15260. USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYNDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
