

Special Issue

Current Research in ADHD among Adults

Message from the Guest Editors

Although attention deficit hyperactivity disorder (ADHD) has been viewed in the past as a mental disorder in childhood, in recent years, diagnoses in adult patients have significantly increased. The high level of comorbid psychiatric disorders and symptom overlap complicate the differential diagnosis of ADHD in adults. A better understanding of ADHD and making it easier to diagnose it accurately can improve overall disease management and reduce its negative effects. This special issue of Brain Sciences aims to present the newest research in the field of adult ADHD including advances in diagnostic and treatment procedures as well as in health services research. Authors are invited to submit cutting-edge research and reviews that address a broad range of topics relating to adult ADHD including epidemiology, evidence-based treatment, prediction of ADHD-specific treatment, different diagnostic methods (e.g. EEG, neuroimaging) with a high translational impact to clinical care. Dr. Maria Strauss, MHBA

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
