

Special Issue

Imaging of Neuronal Environments

Message from the Guest Editors

This Special Issue will focus on neuroimaging studies for visualizing neuronal structure ranging from brain systems to subcellular components in both human and animal models. The emphasis should be on imaging of nervous system interactions with target organs and other tissues or systems. Topics of interest include but are not limited to the following areas: **Peripheral nervous system; Neuronal microenvironment(s); Immunohistochemistry and/or staining tools and their microscopy applications.** Research papers and case reports presenting original studies that fill the above criteria, as well as review articles that relate to the mentioned topics are welcome to this Special Issue.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
