

Special Issue

Insight into the Ability of Language Understanding and Writing in Neurodevelopmental Disorders

Message from the Guest Editors

Neurodevelopmental disorders, which encompass various clinical conditions, are characterized by their heterogeneity, as reflected in heterogeneous language abilities. Differences can be found in both oral language comprehension and production and written comprehension and production. This Special Issue will present empirical studies and theoretical models considering the abovementioned abilities in neurodevelopmental disorders, with the aim of encouraging in-depth studies on various profiles of oral and written language in a single condition or several. Studies on the developmental trajectories of the oral and written abilities of an individual with a single condition or multiple conditions over their lifespan are also of interest. The issue also welcomes studies on interventions implemented at different developmental stages for oral and written comprehension and production. To this end, we are inviting research articles, case studies, and literature reviews.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
