

## Special Issue

# New Perspectives and Methodologies in the Diagnosis and Rehabilitation of Aphasia

### Message from the Guest Editor

Aphasia is a highly disabling acquired language disorder usually caused by a left-lateralized brain damage. Due to its profound impact on the patient's life, clinicians and speech pathologists are continuously faced with the arduous challenge of enhancing aphasia recovery patterns and subsequently long-term outcomes. However, even if traditional linguistic-based therapies have been proven to induce an adequate clinical improvement, a large percentage of patients are left with some degree of language impairments. Thus, new approaches to common speech therapies are urgently needed to maximize the recovery from aphasia. In last decades, scientific advancements in language conceptualization and the progress of new technologies have made new tools available for professional therapists and educators. Although some of these approaches have shown promise, the results are not conclusive, and their interpretation is further compounded by the heterogeneity of study characteristics. The focus of this Special Issue is to publish evidence-based studies which provide novel methods for the diagnosis and treatment of aphasia in clinical practice.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
