Neuroimaging of Neuropathic Pain: Review of Current Status and Future Directions

Message from the Guest Editor

Neuropathic pain is a debilitating condition that can lead to disability. Diagnosis of neuropathic pain can be challenging and difficult to achieve. A group of cortical and subcortical regions show abnormalities when a patient has neuropathic pain. Those changes can be detected using new technologies called neuroimaging. Neuroimaging for neuropathic pain is a growing area of study. Neuropathic pain is associated with changes in different neuroimaging modalities and it is important to understand these modalities and their utilization in clinical practice. We aim to discuss the most recent evidence related to neuroimaging for neuropathic pain and solicit original research articles on the most recent cutting-edge evidence, as well as welcoming submission of review articles and metanalyses.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
