

# Special Issue

## Foundation Treatment and Building Structural Performance Enhancement

### Message from the Guest Editors

We invite authors to submit original research, theoretical and experimental work, case studies, and comprehensive review papers for possible publication. Topics relevant to this Special Issue include, but are not limited to, the following subjects:

- New methods for foundation treatment and enhancing the performance of building structures;
- Low-carbon foundation treatment and building structural performance enhancement technology;
- Innovative and sustainable foundation treatment and building structural materials;
- Digital methods applied to foundations and building structures;
- Performance evaluation of foundations and building structures;
- Reliability and maintenance engineering of foundations and building structures;
- Intelligent monitoring of foundations and building structures;
- The application of intelligent integrated machinery in foundation treatment and building structures.

---

### Guest Editors

Dr. Jiangbo Xu

Dr. Peng Sha

Prof. Dr. Zhi-Feng Wang

Dr. Jiangshan Li

Dr. Song Feng

## About the Journal

### Message from the Editor-in-Chief

Current urban environments are home to multi-modal transit systems, extensive energy grids, a building stock, and integrated services. Sprawling neighborhoods are composed of buildings that accommodate living and working quarters. However, it is expected that the cities and communities of the future will face complex and enormous challenges, including maintenance, interconnectivity, resilience, energy efficiency, and sustainability issues, to name but a few. A smart city uses advanced technologies and a digital infrastructure to improve the outcomes in every aspect of a city's operations. A smart building optimizes the experience of occupants, staff, and management by using a modern and connected environment. Innovations in technology that can bring dramatic improvements to design, planning, and policy are critical in developing the cities and buildings of the future.

---

### Editor-in-Chief

Prof. Dr. David Arditi

Construction Engineering and Management Program, Department of Civil, Architectural, and Environmental Engineering, Illinois Institute of Technology, 3201 South Dearborn Street, Chicago, IL 60616, USA

### Author Benefits

#### High Visibility:

indexed within SCIE (Web of Science), Scopus, Ei Compendex, Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Construction and Building Technology) /  
CiteScore - Q1 (Architecture)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
