Special Issue

Advances in Experimental and Computational Research on Reinforced Concrete Structures

Message from the Guest Editors

We are pleased to invite you to submit a manuscript to a Special Issue of *Buildings*, "Advances in Experimental and Computational Research on Reinforced Concrete Structures". This Special Issue aims to provide a venue for communicating the most recent results of original experimental or computational research on reinforced concrete (RC) building structures. The topics of interest are broad, covering the performance of structural components/systems under hazardous conditions (e.g., strong earthquakes, blasts, and corrosions), mechanical modeling and numerical simulation approaches, the structural application of unconventional materials, and performance-based design approaches. High-quality case studies and critical literature reviews are also welcome.

Guest Editors

Prof. Dr. Ying Tian

Dr. Sarah Orton

Dr. Trevor Hrynyk

Prof. Dr. Liping Wang

Deadline for manuscript submissions

closed (30 January 2024)

About the Journal

Message from the Editor-in-Chief

Current urban environments are home to multi-modal transit systems, extensive energy grids, a building stock, and integrated services. Sprawling neighborhoods are composed of buildings that accommodate living and working quarters. However, it is expected that the cities and communities of the future will face complex and enormous challenges, including maintenance, interconnectivity, resilience, energy efficiency, and sustainability issues, to name but a few. A smart city uses advanced technologies and a digital infrastructure to improve the outcomes in every aspect of a city's operations. A smart building optimizes the experience of occupants, staff, and management by using a modern and connected environment. Innovations in technology that can bring dramatic improvements to design, planning, and policy are critical in developing the cities and buildings of the future.

Editor-in-Chief

Construction Engineering and Management Program, Department of Civil, Architectural, and Environmental Engineering, Illinois Institute of Technology, 3201 South Dearborn Street, Chicago, IL 60616, USA

Author Benefits

High Visibility:

indexed within SCIE (Web of Science), Scopus, Ei Compendex, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Construction and Building Technology) / CiteScore - Q1 (Architecture)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
