

Special Issue

Novelties in the Production of Mineral Binders and Concrete

Message from the Guest Editors

This Special Issue aims to compare the latest developments in the production and application of cement, non-cement binders and concrete with an emphasis on environmental friendliness, corrosion resistance and durability, including but not limited to:

- Advanced production technologies in the cement industry;
- Design and development of cement composites using fibers of biological origin;
- Design and testing of composites based on no cement binders;
- Durability and corrosion resistance tests of concrete.

For more details, please click [Special Issue](#). For scholars interested to submit papers to the Special Issue, please click “Submit to Special Issue” or contact astoria.yao@mdpi.com.

Guest Editors

Prof. Dr. Dražan Jozić

Faculty of Chemistry and Chemical Technology, University of Split, Split, Croatia

Prof. Dr. Sandra Juradin

Faculty of Civil Engineering, Architecture and Geodesy, University of Split, Split, Croatia

About the Journal

Message from the Editor-in-Chief

Current urban environments are home to multi-modal transit systems, extensive energy grids, a building stock, and integrated services. Sprawling neighborhoods are composed of buildings that accommodate living and working quarters. However, it is expected that the cities and communities of the future will face complex and enormous challenges, including maintenance, interconnectivity, resilience, energy efficiency, and sustainability issues, to name but a few. A smart city uses advanced technologies and a digital infrastructure to improve the outcomes in every aspect of a city's operations. A smart building optimizes the experience of occupants, staff, and management by using a modern and connected environment. Innovations in technology that can bring dramatic improvements to design, planning, and policy are critical in developing the cities and buildings of the future.

Editor-in-Chief

Prof. Dr. David Arditi

Construction Engineering and Management Program, Department of Civil, Architectural, and Environmental Engineering, Illinois Institute of Technology, 3201 South Dearborn Street, Chicago, IL 60616, USA

Author Benefits

High Visibility:

indexed within SCIE (Web of Science), Scopus, Ei Compendex, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Construction and Building Technology) /
CiteScore - Q1 (Architecture)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the first half of 2025).
